

K2548-JJ

Omnipure 2" x 10" All Calcite; 1/4" FQC

The K2548 inline calcite filter is one of Omnipure's K series inline filters that easily install directly to your water line and reduce weeping or seepage potential. This filter contains calcite, a crushed and screened white marble media, to neutralize acidic or low pH waters to a safer, less corrosive effluent.

NOTE: 1/4" refers to the outside diameter of tubing.

Operating Instructions

- Capacity: 6-12 months (NZ condition)
- Flow Rate: 1 GPM
- Maximum Pressure: 125 PSIG
- Temperature: 2-38°C

General Installation/Operation/Maintenance Requirements

- Note flow direction of filter.
- Flush new cartridge with 5 gallons of water prior to use and check for leaks. If leaks occur, check tightness of tubing and fittings. If leaks persist, discontinue use and call your supporting dealer.
- Replace cartridge when rated capacity (6-12 Months) is reached, or when flow becomes too slow.
- Install in compliance with state and local laws and regulations.
